

# Health o meter<sup>®</sup> Professional Scales + CEIBA'S IoMT eConnect Box = State-of-the-Art EMR Integration

Health o meter<sup>®</sup> Professional scale customers can seamlessly integrate their height and weight patient data into their EMR systems with CEIBA's device-agnostic IoMT interoperability. CEIBA Healthcare's IoMT eConnect Box and Cloud platform allow customers to swiftly and **securely integrate their existing and new Health o meter<sup>®</sup> Professional scales to 20+ EMR or third-party systems.**

- Wireless connections from the scale to Ceiba's eConnect Box are available via our BTKIT-100 solution. Easily integrate to streamline operations, reduce risk, and better serve patients
- You don't have to buy a new scale – the system is compatible with new and existing Health o meter<sup>®</sup> Professional scales
- Health systems can integrate their scales and more than 1,000+ devices that Ceiba Healthcare already supports
- Brings true HL7 Fast Hospital Interoperability Resource (FHIR) data encryption to a health system's integration initiatives
- Plug-and-play protocol with the 20+ largest EMR systems in the US, including Epic, Cerner, and PointClickCare
